## Handles - everything.

*"Quality is never an accident,  
it is the result of intention, innovation and skillful execution."*

The newly designed Supersafe High Security Entrance Lock is packed with features that you will not see in any other locks on the market. The new and improved mechanism is clean and engineered for simplicity ensuring a **7 YEAR MECHANICAL WARRANTY**.

Apart from the new durable heavy duty steel casing, the new Supersafe High Security Entrance Lock has a full sized locking bolt made from one piece of solid brass. The advantage of a full length solid bolt makes it virtually impossible for a burglar to force their entry by ramming the lock. The door jamb or the door itself will break before the solid bolt and steel case give way!

With a positive "flick" action single throw to lock/unlock the door, the bolt extends 24mm from the face of the lock (9001/9003 range) so you can rest assured that your most valuable possessions are superSAFE and secure.

## SuperSafe High Security Entrance Lock

## HANDLES - EVERYTHING

Superior Brass is a quality conscious company that has continuously invested in research and development which is the corner stone behind the release of many award winning products that are covered by international patents. This model of business practice has created a corporate culture that has built Superior Brass a formidable reputation as leaders in the Australian builders hardware market.

Superior Brass's corporate ethos is all about taking the initiative to release products which revolve around the customer's requirements and the 'Critical 4': **Functionality, Durability, Aesthetic Design and Affordability.**

A combination of Australian and European designers have focused on creating innovative products that are unique and exclusive to Superior Brass. Quality conscious hardware buyers have enabled Superior Brass to be the first to introduce (1995) the now popular PVD anti- tarnish brass finish range of door furniture. Superior Brass has pioneered many such innovations and has always provided consumers with the choice to take advantage of the latest technologies science has to offer, the choice of a comprehensive range of styles from which to choose and a variety of popular finishes.

With the combination of state of the art Italian CNC machinery and an emphasis on using quality raw materials, the 'Critical 4' and of course consumers like you, Superior Brass is well established and committed to providing the hardware industry with quality products well into the future.

"Quality is never an accident, it the result of intention, innovation and skillful execution."
